Risk Measures

Risk Measures	3 years
Alpha	2.36
Beta	1.04
R-Squared	85.00
Standard Deviation	10.42

Risk measures are in comparison to the fund's primary benchmark unless otherwise indicated. Based on the indicated class shares at NAV for the 3-year period. **Past performance is no indication of future results.**

Alpha is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility.

Equity Statistics

Median Market Cap	$47.86 (B)
Weighted Average Market Cap	$256.20 (B)

B = Billions

Fund Facts

Portfolio Name	American Funds - Growth Fund

American Funds - Growth Fund

Class 2 as of 09/30/18

Investment Strategy

The fund invests primarily in common stocks and seeks to invest in companies that appear to offer superior opportunities for growth of capital. The fund may invest up to 25% of its assets in common stocks and other securities of issuers domiciled outside of the United States.

This portfolio is only offered as an investment option within a variable annuity contract.

There are other investment choices available with different management fees associated with each choice.

Variable annuities are long-term, tax-deferred vehicles designed for retirement purposes. They offer three main benefits: tax-deferred treatment of earnings, guaranteed death benefit options, and guaranteed lifetime payout options. Variable annuities are subject to investment risk, including possible loss of principal.

The value of the variable annuity will fluctuate so that when surrendered, it may be worth more or less than the total of premium payments.

Growth stocks can be volatile and experience sharp price declines and certain types of stocks, especially technology stocks, can be extremely volatile and subject to greater price swings than the broader market.

Tha market prices of fixed-income securities may go up or down, sometimes rapidly or unpredictably due to general market conditions.

S&P 500® is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index.

You should consider a variable annuity's investment objectives, risks, charges, and expenses carefully before investing. Go to transamerica.com for prospectuses containing this and other information. Please read them carefully.

Annuities issued in all states except New York by Transamerica Life Insurance Company, Cedar Rapids, Iowa and in New York by Transamerica Financial Life Insurance Company, Harrison, New York. Annuities are underwritten and distributed by Transamerica Capital, Inc., 1801 California St. Suite 5200, Denver, CO 80202. Member FINRA.
