Risk Measures

3 Years	Initial Class	Service Class
Alpha	-1.23	-1.51
Beta	0.99	0.99
R-Squared	0.76	0.76
Standard Deviation	11.66	11.66

Risk measures are in comparison to the fund's primary benchmark unless otherwise indicated. Based on the indicated class shares at NAV for the 3-year period. **Past performance is no indication of future results.**

Alpha is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility.

Equity Statistics

Median Market Cap	$11.10 (B)
Weighted Average Market Cap	$15.68 (B)

B = Billions

Fund Facts

Portfolio Name	Transamerica Janus Mid-Cap Growth VP*
Benchmark Index	Russell Midcap® Growth Index
Lipper Category	Mid-Cap Growth

Portfolio Characteristics

Net Assets	$1.15 Billion (all share classes)

Investment Strategy

The portfolio's sub-adviser, Janus Capital Management LLC (the "subadviser"), under normal conditions, invests primarily in common stocks selected for their growth potential, and normally invests at least 80% of the portfolio's net assets (plus the amount of any borrowings for investment purposes) in equity securities of medium-sized companies. Medium-sized companies are those whose market capitalization falls within the range of companies in the Russell Midcap® Growth Index which, as of December 31, 2017, was between $389 million and $35.3 billion. The portfolio may also invest in foreign securities, which may include investments in emerging markets, and it may invest up to 5% of its net assets in exchange-traded funds.

Variable annuities are long-term tax deferred vehicles designed for retirement purposes. They offer three main benefits: tax-deferred treatment of earnings, guaranteed death benefit options, and guaranteed lifetime payout options. Variable annuities are subject to investment risk, including possible loss of principal.

The value of the variable annuity will fluctuate so that when surrendered, it may be worth more or less than the total of premium payments. Past performance is no guarantee of future results.

A number of investment options, or subaccounts, are available under the variable annuity.

Investing in small- and medium-size companies involves greater risk than is customarily associated with more established companies. The securities of small and mid capitalization companies are subject to higher volatility than larger, more established companies.

Growth stocks can be volatile and experience sharp price declines and certain types of stocks, especially technology stocks, can be extremely volatile and subject to greater price swings than the broader market.

Tha market prices of fixed-income securities may go up or down, sometimes rapidly or unpredictably due to general market conditions.

There are other investment choices available with different management fees associated with each choice.

The Russell Midcap® Growth Index is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index. Russell Investment Group is the source and owner of the trademarks, service marks, and copyrights related to the Russell indexes. Russell® is a trademark of Russell Investment Group.

You should consider a variable annuity's investment objectives, risks, charges, and expenses carefully before investing. Go to transamerica.com for prospectuses containing this and other information. Please read them carefully.

Annuities issued in all states except New York by Transamerica Life Insurance Company, Cedar Rapids, Iowa and in New York by Transamerica Financial Life Insurance Company, Harrison, New York.
